12th International PERI Construction Exercise 2018|2019

November 2017 | müs

Dear Mr Doc. Marovic,

The tasks for the 12th International PERI Construction Exercise is now available.

With this new project, we offer you the possibility to start working on the exercise right now!

Please provide your students with the opportunity to participate in the competition, ideally as an integral part of their studies or training program.

More information is available in the enclosed documents. We would be pleased to send you additional copies of the poster.

We look forward to welcoming numerous participants and wish you every success.

Best regards from Weissenhorn.

**To the
Educational Institutions for Civil Engineering
and Construction Management**

Dear Sirs,

For the 12th time, PERI is organizing a construction exercise that is targeted at all educational institutions that offer construction-related courses. This exercise covers many different aspects of the construction business. The goal is to deepen the knowledge of these topics using hands-on tasks especially in concrete estimating and formwork technology.

Entries that comply with the rules will compete for the award of the

PERI - Prize

The total prize fund is more than € 20.000!

The contributors of the five best studies will be invited to the final qualification that takes place in Weissenhorn, Germany in November 2019. The students present their work to the auditorium. The jury will be comprised of renowned construction specialists. Who will then decide on the final placings during the 3-day event, which will also include an organized evening program for all participants.

The exercise can be executed in groups up to 5 people. The submissions, to be completed in English or German, are limited to 100 pages (including plans and layouts). Submitted entries will not be returned as they become the property of PERI. PERI receives the publication rights by mentioning the name of the author. Last date of entry is **31 July 2019** (date of postmark). The judges decision is final!

You can order the tasks on the Internet at the following address:
